Specialties

Software applications, web applications, web standards, networking, computer science applied to human interaction, programming languages, team management.

Work History

ÜberResearch GmbH

December 2016 - present

Senior Software Engineer

In ÜberResearch my work consist in managing the frontend for the current release and the upcoming release of the main company product.

YOOX Net-A-Porter Group

2011 - December 2016

Senior Frontend Developer / Tech lead for in-season multibrand

I have lead a development team in charge of the frontend in-season multibrand e-commerce platform. By coordinating the activities with other tech areas and acting as a liaison with all the other departments in the company, I helped the commercial team deliver the best experience to users.

Through the frontend communities I advocated the use of web standards and agile techniques to improve collaboration and keep high standards in the tech departments.

YOOX Net-A-Porter Group

June 2010 - 2011

Senior Frontend Developer

As a frontend developer for the Mono brand Product Team, I've lead a team of web designers and developers in the release and maintenance of several Online Stores; we

worked using the asp classic, .NET, XSLT server-side and javascript, css, flash and flex on the client side.

Published and maintained the Online Stores for the following brands: Diesel, Moschino, Maison Martin Margiela, Coccinelle, Napapijri

ObjectWay

Sept. 2009 - June 2010

Flash Developer Consultant

I've worked as a Flash / Actionscript 3 Developer Consultant for the YOOX Group Monobrand Product Team. While working in a flash specialized team I was in charge for the common libraries to all the flash platform, providing infrastructure to other developers.

With my team we also released and maintained the following Online Stores: Moschino, Valentino, Napapijri, Roberto Cavalli, Alberta Ferretti

JDT

2008 - July 2009

Web and RIA Developer

Released a number of web and desktop applications using Adobe Flash and AIR, php javascript and CSS, using Wordpress and JOOMLA as backend.

NextMedia Lab

2006 - 2008

Web / Game Developer

Developed and managed projects, internal tools and learning games for: Costa Crociere, Unicredit Group, Banca Etruria, Magneti Marelli, Intesa San Paolo, Sanofi - Aventis
